

EMBEDDED SOFTWARE DEVELOPER

ABOUT US:

Smartrend Supply Ltd., established in 2004, is a leading manufacturer of customer-specific components and assemblies for transportation and general industrial applications. In 2018, First Light Safety Products was created as a subsidiary of Smartrend Supply Ltd. First Light, an innovative and progressive organization, incorporates LED technology into essential safety indicators to improve the visibility of school buses, thus increasing the safety of drivers and passengers of buses and other motor vehicles. Both organizations share a 29,000 sq ft, state of the art manufacturing facility.

SUMMARY:

The **Embedded Software Developer** is a detailed professional who has strong problem-solving skills and able to work under pressure and time constraints. The ESD will develop system architecture design for SMG and FL's line of products. The successful candidate is a team player and is capable of presenting technical information to customers and our internal team.

DETAILED DUTIES AND RESPONSIBILITIES:

- Assist in the development of user and system specifications
- Assist in the development of system architecture design
- Implement software based on specifications and design
- Implement test software for software and hardware testing
- Work closely with System, Hardware, and test engineers throughout the embedded software design/development life cycle
- Work directly with customers to ensure embedded software meets key mission requirements
- Document software design and participate in design and code reviews
- Perform software/hardware integration during software development and unit testing

KNOWLEDGE, SKILLS, AND ABILITIES REQUIRED:

- Education: BS Degree in Electrical or Computer Science or equivalent
- Knowledge of Linux systems
- Knowledge of Real Time Operating Systems
- Knowledge of IP networks, SNMP, managed network devices
- Knowledge of CAN Bus and J1939
- Familiarity with automated build environments, test strategies, and static code analysis
- Experience with working and debugging electronics
- Experience in designing transportation, agriculture, and/or construction vehicle electronic devices/systems
- Understanding of FMEAs and DFM (design for manufacturing) guidelines
- Possess creativity for production development
- Exposure to design and verification testing methods
- Strong problem-solving abilities
- Computer knowledge and skills with Microsoft Word, Excel, PowerPoint
- Ability to prioritize and manage multiple projects simultaneously
- Project management, leadership, and presentation skills is an asset
